Order Sheet for Plants and Bulbs

We always recommend having plants sent by express, at purchaser's expense, when there is an express office near, as we can usually send somewhat larger plants, and do not have to wash the soil off the roots (as in the case when sent by mail). We always try to add enough extra plants of our own selection to help pay the charges. Kindly write your list of plants all together on this page (not mixed up with the seeds) so as to prevent any mistake upon the part of our clerks in copying the order. We do not ship plants to Canada, Mexico and Foreign Countries. Be sure to read paragraph marked "Plant Shipments" on Page 3 of Catalog.

The Front Line Defense Against Hunger!

To My Friends Who Believe In Gardens:

The question is often asked—Does It Pay to Have a Family Garden? You and I know that it does pay from practical experience, and to those who have any question about the problem, we are presenting illustrative facts on this page based on researches made by the United States Department of Agriculture. In these times of stress, we must conserve our resources and make every minute and every penny count. Let’s start the New Year with a firmer determination than ever to have a good sized garden—to grow more vegetables and flowers—to keep a record of costs and sales. One season’s profits will prove beyond a doubt that you can make a handsome profit by growing more vegetables.

Consider these facts: Today, in every home, there is a big seasonal demand for fresh, crisp “home grown vegetables”. Health authorities everywhere say “eat more vegetables”. Schools teach the value of vegetables in the child’s daily diet. Everyone has been told, and facts prove it, that the vitamins and minerals so generously found in vegetables are necessary to good health. No wonder there is a growing demand for garden products.

Another reason for this growth is the fast-increasing demand for salads in the home. Salads for lunch. Salads to make the daily dinner more appetizing and healthful. The manufacturers of salad dressings are doing a volume of business these days. Vegetable salads are easy to make and there are many varieties. It’s hard to find a housewife who hasn’t several recipes for vegetable salads. Who raises all these vegetables? Why shouldn’t you get some of these good profits?

Have you ever stood near the telephone in a grocery store early in the forenoon when home-grown vegetables are in season? One housewife after another asks about fresh vegetables. Nearly every order calls for them. Somebody has to grow these vegetables. Why not you?

The market for vegetables is a big one—and it is a steadily growing market. There is a daily demand in every community—giving you a steady and profitable income right through the season. Vegetables are easy to raise, easy to care for, and a vegetable and flower garden is something in which every boy or girl in the family can take a real interest.

Consider carefully the figures at the top of this page taken from a recent United States Government Report and then decide to plant a real good garden this year. The satisfaction that you will receive from picking choice crisp vegetables from your own garden and the profits that you will receive from your surplus will amply reward you for the time and care that you give your garden. Buckbee’s “Full of Life” reliable seeds have a National Reputation of Reliability—we shall continue to serve you faithfully—it will be a pleasure to have you inspect our establishment whenever your time permits, and we shall be glad to have you write us about your garden problems—our sixty-two years of practical experience is yours for the asking.

We will deeply appreciate receiving your orders and those of your friends as early as convenient.

Yours For Success

H. W. Buckbee.

We do not employ agents to sell our seeds and plants—All orders should be addressed to us at Rockford, Illinois.

**THE BEST BUSH LIMA BEANS**

**BUCKBEE’S IMPROVED BUSH LIMA**

Superior Quality, Exquisite Flavor, Fine Color, Good Shipper, Hardy Grower, Exceptionally Productive, Matures Early, Excellent Keeper.

This is the very “newest” in the Bush Lima Bean. It greatly excels all other Bush Limas in productiveness, being practically loaded down with pods continuously from early Summer till frost. It matures extremely early. It is suitable, therefore, for all sections North and South, and is a continuous bearer until frost. In size the beans are what might be termed intermediate, not so large as the Burpee Bush Lima, but considerably larger than the Henderson’s Bush Lima, making it, in our estimation, the finest size for all purposes. The bush is sturdy in habit and about 24 inches high, having good large leaves. It bears its fruit on long spikes in heavy clusters well out from the plant. There are several pods in each cluster, as many as ten having been counted. Each pod contains on an average of four Beans, though there are more containing five than three, so you see that it is a great improvement over the old-fashioned Bush Limas which oftentimes have only one or two in a pod. Considering the large number of pods on a bush, the yield is amazingly enormous. In quality the Bean is par excellence, flavor unsurpassed, and color the very best, both before and after cooking. Valuable also as a shell bean for winter use. Send to BUCKBEE for originator’s stock seed. Pkt. 10c; ½ lb. 30c; 1 lb. 50c; 2 lb. $1.25; 5 lb. $2.25; 10 lb. $3.05, postpaid.

**NEW JACKSON WONDER BUSH LIMA**

Medium Size, Beautifully Colored Speckled Beans. This is the most productive and very earliest of the Bush Limas. It is of true bush form, about 2 feet high, bearing in greatest profusion, broad, flat pods, each having from three to five medium-sized, handsomely speckled Beans, which cook quickly and are of superior quality. Good for Summer use, and as Winter shell Bean. A splendid Bean for the home garden. Pkt. 10c; ½ lb. 22c; 1 lb. 40c; 2 lb. 75c; 5 lb. $1.75; 10 lb. $3.05, postpaid.

**BURPEE’S IMPROVED BUSH LIMA**

The Earliest Large Seeded Bush Lima. One of the Best for Market as Well as the Home Garden. This is the earliest of the large seeded Bush Lima Beans. The first pickings fit for the table may often be taken in July and from that time until frost a continuous supply may be gathered. It is fully 8 days earlier than the old Burpee’s Bush Lima and produces larger pods and more and larger Beans in the pod than this variety; the seed is also considerably thicker. The plants grow upright about 30 inches in height and often measure 24 inches across the top. Pkt. 10c; ½ lb. 25c; 1 lb. 45c; 2 lb. 85c; 5 lb. $1.95; 10 lb. $3.45, postpaid.

**FORDHOOK BUSH LIMA**

Exceptionally Fine Quality. The Leading Bush Lima in the East. An improved Dreer’s Bush Lima. The plant is vigorous and erect growing, bearing the pods well above the ground. The pods, which are produced in large clusters, are medium green, about 4½ inches long, and each contains three to five large Beans of exceptionally fine quality. Seed large, irregularly oval in shape, very thick, white with greenish tinge. Pkt. 10c; ½ lb. 28c; 1 lb. 48c; 2 lb. 91c; 5 lb. $2.15; 10 lb. $3.80, postpaid.

**BURPEE’S BUSH LIMA**

Erect, stout bushes, 18 inches high, and with a diameter of 2 to 3 feet. Very productive. Large pods filled with large beans of luscious quality. Pkt. 10c; ½ lb. 23c; 1 lb. 46c; 2 lb. 76c; 5 lb. $1.75; 10 lb. $3.00, postpaid.

**HENDERSON’S BUSH LIMA**

Compact bushes one foot high. Valuable on account of its earliness and productiveness. Pods are medium dark green, about 2½ inches long and contain from 2 to 4 Beans, which are of excellent flavor, either green, shelled or dry. Pkt. 8c; ½ lb. 10c; 1 lb. 34c; 2 lb. 63c; 5 lb. $1.45; 10 lb. $2.40, postpaid.

MANGEL WURTZELS

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

Any land that will grow a good crop of Corn will produce a good crop of Mangels or Sugar Beets, which are surer crops than any other root.

Mangels give one-third greater increase of milk in feeding cows than does the same weight of Potatoes. Forty tons Mangels (a crop of an acre) have as much nutritive matter as 130 bu. of corn and are more digestible. Send to Secretary of Agriculture Washington, D. C., for Special Bulletin on Mangels and Beets.

Plant five pounds of Seed per acre.

BUCKBEE'S MASTODON

It grows well above ground and on account of its shape is easily harvested. In length is about the same as Buckbee's Mammoth Long Red, but is more remarkable for its handsome shape and broad shoulders, the diameter being greater, and in weight much heavier; flesh deep red, fine texture, roots solid, tops small. SUGAR BEETS

FOR STOCK FEEDING

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

BUCKBEE'S GIANT FEEDING SUGAR

The Greatest Beet for Feeding Stock

The magnificent Sugar Beet, while giving nearly as large a yield of easily grown and harvested roots as a crop of Mangels, supplies a food of very much higher nutritive value, being much richer in sugar. They yield, under equally favorable conditions, more than double that of sugar beets and, not being so sweet, are less liable to injure the kidneys when fed in large quantities. The roots grow about two-thirds out of the ground and because of this and their shape the crop can be harvested and stored at less expense than any other root crop. Roots very large, smooth, clean and of oval shape; white skin, white flesh. Every farmer should try it. Oz. 10c; 2 oz. 15c; ½ lb. 25c; ¾ lb. 35c; 1 lb. 65c; 2 lbs. $1.15; 5 lbs. $3.25; 10 lbs. $6.50, postpaid.

BUCKBEE'S NEW IMPERIAL SUGAR

This Beet is the result of years of methodical and persevering selection. It is extremely rich in sugar, thousands of analyses showing that the average percentage of sugar attained by this variety is about eighteen and its average yield may be stated as from 15 to 16 tons an acre, but crops of 25 to 40 tons per acre have been obtained. Flesh dry, grained and very sweet. We sell thousands of pounds each year to the large growers and Beet sugar factories through the country, always with the most satisfactory results. Oz. 10c; 2 oz. 15c; ½ lb. 35c; ¾ lb. 40c; 1 lb. 70c; 2 lbs. $1.15; 5 lbs. $3.25; 10 lbs. $6.50, postpaid.

Buckbee's “Full of Life” Seeds Are Bred for Disease Resistant Qualities

Buckbee’s Famous Great Dane
The Hardest Headed Late Cabbage. The Gardener’s Favorite, the Best Shipping and Longest Keeping Cabbage.

For years large quantities of Danish Cabbage have been imported to our leading markets, the heads being of such solidity that the demand has been far in excess of the supply. To get to the source of this supply, we sent an expert to Denmark, who after careful inspection of the cabbage-growing localities found at the Island of Amagar the GREAT DANE Cabbage, which he considered by far the finest and most productive of all the types grown in Denmark, and he contracted with its originator for all the seed he could supply. The stem is medium sized, heads are almost as round as a ball, of good size, perfectly solid, very fine grained, of the best quality.

We control the entire seed supply and offer the choicest ‘FULL OF LIFE’ Seed (grown by the originator in Denmark), at the following reasonable prices. Send to Buckbee for the true ‘Great Dane.’

Buckbee’s Chinese or Celery Cabbage
A Most Delicious, New Vegetable Which Should Be in Every Garden and Which Is One of the Most Profitable Crops to Grow for the Market. As Tender as Lettuce; Flavor as Delicate as Celery.

The Chinese or Celery Cabbage belongs to the Cabbage family; when young, it resembles a smooth-leaved Chard-Beet, leaves being light green and crimped; the plant as it matures forms heads much like Cos Lettuce, which are about 15 inches high, have a diameter of 6 to 8 inches, often weigh 4 lbs., and are as firm and solid as Cabbage; their heart blanches to a crystalline white, whiter than any Lettuce or Cabbage. The leaf is as tender as Lettuce and has as distinctive a flavor, being very delicate and pleasant; every leaf, including the outside ones, is tender and edible. It is served on the table like Lettuce with French dressing; or if cut up like Cabbage and served with mayonnaise or French Dressing, it makes a splendid cold slaw.

It can also be cooked like Cabbage, but it is without the strong Cabbage flavor and tastes more like Cauliflower. Our seed is Chinese grown, which is the only reliable stock for good solid heads.

BUCKBEE’S “Full of Life” CARROTS

Buckbee’s “Full of Life” Seeds Are Bred for Disease Resistant Qualities.

The best soil for the Carrot is a sandy loam made rich by manuring; any good land if thoroughly and deeply worked will produce satisfactory crops. It is advisable to sow as early in the Spring as the ground is fit to work, though good crops may be grown from sowings as late as June 15. For table use sow the smaller kinds early in rows 16 to 18 inches apart. For field culture sow in drills 18 to 24 inches apart, using from 1½ to 3 pounds of seed to the acre. Cover ½ to 1 inch deep and see to it that the soil is pressed firmly above the seed. As soon as the plants appear, use the cultivator or wheel hoe. Thin 2 to 6 inches apart in the row, according to the size of the variety.

Buckbee's "Full of Life" Sweet Corns

If You Want Delicious Corn on Your Table the Fourth of July
Plant This Extremely Hardy, Early Maturing, Large Eared Sort.

We have produced in this early corn a variety which stands alone as a money maker. It is in the same class as the Earliest of All Sugar Corns, considerably larger and, best of all, contains a sweetness equal to most true sugar varieties. It has the power of germination under conditions where all others have failed and can safely be planted much earlier than any true sugar corn on account of its extreme hardiness. It adapts itself to any kind of soil, either sand or heavy clay.

It is as large as Stowell's Evergreen. The fodder grows 6 feet high; no small item to a gardener; and, as a proof of its quality and sweetness, we have a continuous call for "Everbearing" from our customers year after year. The ears are of good size and covered with kernels clear to the end of the cob. Each stalk will produce one to two well developed ears. Now, if these are picked when mature, one or two and even four more ears will set and develop on the same stalk during the next two to four weeks.

Pkt. 10c; ½ lb. 21c; lb. 38c; 2 lb. 67c; 5 lb. $1.65; 10 lb. $2.75, postpaid.

Buckbee's New Golden Sunshine

The 12 Rowed Golden Bantam.
Early—Sweet—Prolific—Good Size.

This new Sweet Corn is a wonderful improvement over the popular Golden Bantam, as it is larger, sweeter, has 12 rows instead of 8 and is from 10 days to two weeks earlier. The flavor leaves nothing to be desired, as it is rich and sweet and never becomes tough and woody. There is a great demand for this variety and we were entirely sold out early last year, so order early if you desire one of the finest Sweet Corns you ever tasted.

Buckbee's Selected Mammoth Early
White Cob Cory

Famous for Earliness, Size and Sweetness.

A very fine early variety but somewhat later than Buckbee's Early Sunrise, and is very largely planted by market gardeners to follow this variety; it has proven a well-paying crop for them. Mammoth Cory is a selection from the old White Cob Cory, but its ears are 12-rowed and the kernels set very closely together so that there is no lost space on the cob. The grain is large, broad, very white and of sweet, delicious quality. The plants are vigorous growers of medium height and are very prolific.

This is a finely bred Sweet Corn with handsome symmetrical ears and is worthy a place in every garden.

Pkt. 8c; ½ lb. 19c; lb. 32c; 2 lb. 59c; 5 lb. $1.35; 10 lb. $2.15, postpaid.

Black Mexican

This corn, when very young, cooks remarkably white, but the ripe grain is bluish black. For home use we consider it the best second early sort where tenderness and sweetness are the qualities most desired. It does especially well as a second early variety in the South. The stalks are about 6½ feet high. The ears are about 8 inches long and are usually eight rowed.

BUCKBEE'S EARLIEST FORCING

The Earliest Lettuce Grown.

For those who like a large, thin, exceedingly tender leaf, and for those markets which demand a large, loose cluster of leaves rather than a solid head, this is the best variety for forcing and growing in the open ground. The plants form a large, loose head, rich light green in color and blanch nicely. The leaves are very much blistered and crumpled, crisp and are of excellent quality. This is the earliest of all Lettuces; it is a splendid shipper, of beautiful appearance and keeps in good condition better than any other sort. It is a money-maker for the market gardener, either if sown under glass or outdoors, and is very satisfactory for the home garden. Pkt. 10c; oz. 15c; 2 oz. 28c; % lb. 45c; ½ lb. 80c; lb. $1.50; 2 lb. $3.90; 5 lb. $6.95; 10 lb. $12.90, postpaid.

BUCKBEE'S MAMMOTH ALL HEAD LETTUCE

The World's One Unbeatable Head Lettuce

Mammoth All Head is a great improvement on the well-known Big Boston Lettuce. It forms larger heads, more compact and tightly folded, and is about ten days earlier than the white or black seeded variety. It is without the reddish brown tinge on the leaves and, furthermore, it can be sown all through the growing season, and stands heat remarkably well. It is slow to run to seed, and will not scald or burn and will make a head when other varieties fail. Mammoth All Head is one of the earliest, large Cabbage-Lettuces grown, forming heads in six weeks from sowing, and the heads grow to a large size, often more than 12 inches across, are solid and compact with few outer leaves; of an attractive bright light green color, never spotted or reddish in any part. They blanch creamy white, have decidedly buttery flavor and are crisp, tender and sweet. This is the grandest, most valuable Lettuce ever introduced. Pkt. 10c; oz. 15c; 2 oz. 28c; % lb. 50c; ½ lb. 95c; lb. $1.75; 2 lb. $3.40; 5 lb. $8.25; 10 lb. $15.40, postpaid.

THE SWEETEST FLAVORED MELON KNOWN

The Best Variety for the Table—For Shipping and Long Keeping

In hundreds of markets every season it finds ready sale at good prices when all other sorts go begging for buyers. This grandest of all varieties has been extensively grown the past few seasons in almost every melon growing locality of the world, and in not one single instance has it failed to meet the expectations of the planter. The reports received from every section, that all are delighted with it, prove that in the hands of our customers Buckbee's Monte Cristo has given the same surpassing results as in our careful trials on Rockford Seed Farms. The greatest yielder. The sweetest, juiciest, crispest and most solid Melon ever produced, never having a hollow or pithy center when ripe. The easiest to sell on the market, for when once tried, people will have no other. Many of our customers have written us, that they have cleared $100 or more per acre by growing Buckbee's Monte Cristo Melons. Under average cultivation you can do as well or better. Will you not try it this year? This is an early variety, ripening about a week or ten days later than the extra early kinds offered in this book. It is a grand, good shipper, has a firm, solid rind, not too thick, yet will stand the most severe handling. The outside skin is of a rich, dark green color, shaded with faint stripes of a somewhat lighter color. Certainly the finest appearing Melon ever grown for market, shipping or table purposes. While our supply of seed is fairly large, we always have advance orders from our customers, who have planted Monte Cristo in past seasons and we would advise all who care to plant this “King of Melons” in 1933 to place their orders as early as possible. Please remember that we control the entire product of this variety, so send to Buckbee for choicest stock seed of Buckbee's Monte Cristo Melon. Buckbee’s “Full of Life” seeds are bred for disease resistant qualities. The price is within the reach of all.

IMPORTANT NOTICE

The United States Department of Agriculture, and particularly the State of Illinois, are spending a great deal of time and money in combating the Water Melon Wilt Disease. We are working along with them, and much good has already been accomplished. We believe that our seed is as good if not better than any other in the country.

Tom Coleman, Guthrie, Ky.—I planted Buckbee's Monte Cristo Melon this year and they were fine. So is your Dead Shot.

GROWING MUSHROOMS IS NOT DIFFICULT
Get Reliable Spawn. Start Right and the Results Are Certain and Profitable.

We furnish every buyer of Mushroom Spawn with explicit directions for growing. If they are followed, nothing is so certain as big success.

The Mushroom is a delicious, edible fungus. It produces no seed, but instead a white fibrous substance in broken threads called spawn, which is developed and preserved in horse manure and pressed in form of bricks.

No expensive equipment is ever necessary for the propagation. The plain fact is that anyone who starts right can grow Mushrooms successfully. An abandoned outhouse, or waste space in one, a shed, a basement or a cellar can be used for growing Mushrooms and will answer the purpose excellently.

FACTS ABOUT BUCKBEE'S SURE CROP SPAWN

We can safely assure all Mushroom growers, as well as those who have never grown any, but are on the point of trying it, that they will find Sure Crop Spawn to be all that is claimed true to type, in much greater abundance, of much earlier maturity and of much larger size than those grown by any other method, and these Mushrooms are in great demand at the very highest market prices. In order to meet the demand for Sure Crop Spawn, and to provide against deterioration of its producing qualities, our arrangement with the producer is for frequent shipments which, coupled with the care we give it, renders it absolutely certain that our customers will all be furnished with Spawn that is fresh, of quick vigorous growth and if they handle it properly will bring them big returns.

Buckbee’s Prizetaker

Beautiful Color—Ideal Size—Uniform Shape—Exceptionally Good Keeper—Wonderful Flavor—Always at Its Best.

Unexcelled for Home Use or the Market.

Buckbee’s Genuine Prizetaker Onion has proved itself to be one of the handsomest and most productive large Yellow Globe Onions which are grown extensively today. It grows as easily as any other sort, and can be used for all purposes—the young plants as salad, the half-grown bulbs in early summer, and the perfect mature Onion practically at all times, for it keeps so well that it may be used almost the year round. It is esteemed not only in America, but in foreign countries. Soon after its introduction it was exhibited in London, and in the keenest competition with the products of the most skillful growers, earned an “Award of Merit” from the Royal Horticultural Society of England. Not only does it grow to a large size, but uniformly so. The shape is true globe, broad at the base, tapering sharply at the top. It is so well bred that the tops dry down entirely when it ripens, leaving a clean, sound bulb, perfect in form, rich in color, and wonderfully solid. The outer skin is rather pale yellow, the flesh pure white throughout. It is extremely mild in flavor, very much esteemed for slicing, baking and boiling; in fact, in whatever way it is prepared, it is unsurpassed. The various strains, good, bad and indifferent that are generally offered to the unwary planter come to maturity all the way from August up until as late as October. The Standard White Onion for Market and Family Use.

Medium size bulbs of flat shape, which ripen evenly and quite early—about 16 days earlier than Southport White Globe. They are of handsome appearance; have a clear white skin as beautiful as glistening silver. The flesh is of mild, delicious flavor. For keeping, this is the best of all white varieties.

A gardener who does not care to plant more than one variety should use this one, and everyone should make a liberal sowing of it for continuous use. These Onions make fine bunching of Green Onions and are also grown for the market as large White Onions. They are also much used for pickling and for Onion Sets. Buy your seeds from first hands. Our own growth, choicest Northern-grown, high-grade pedigreed stock seed. Pkt. 7c; oz. 30c; 2 oz. 55c; ¼ lb. 60c; ½ lb. 95c; lb. 1.35; 2 lb. 3.80; 5 lb. 8.95; 10 lb. 14.35, postpaid.

Buckbee's Mammoth Silver King

The King of White Onions—Its Mildness of Flavor and Tenderness Are Unsurpassed.

The largest white onion. Grows to a remarkable size—average diameter is from 5 to 7½ inches. Single bulbs often attain weights of over 4 pounds each. There is no other white Onion which approaches mammoth size. The shape is flattened, but thick through. The skin is of a beautiful silvery white. The flesh is of a snowy white and is of a particularly mild and pleasant flavor. Being a sure cropper, producing immense Onions and enormous crops which bring the highest prices, this variety has been a great money-maker for the grower; but its fine, mild flavor makes it also most desirable for the private gardener. Send to Buckbee's Rockford Seed Farms for the grower; but its fine, mild flavor makes it also most desirable for the private gardener. BEAN

Buckbee’s New Monarch Wax Bean

Our New Monarch Wax Bean is a very sturdy and vigorous grower and as near rust proof and disease resistant as it is possible for a bean to be. One of the earliest wax beans ever grown, starting to bear within 60 days after planting and continues its bearing season longer than most others. Pods are of splendid quality, fleshy, and are stringless at practically all stages of their growth. From 6 to 7 inches long by % inch through and almost round, they make a wonderfully heavy yield, and the beautiful golden yellow color sells them easily. Seed is long, oval, medium size and purplish black color. In common with other black-seeded varieties, this bean may be planted quite early in the season. Practically rust proof, owing to the habit of the plant which branches freely but is perfectly sturdy and upright, every branch carrying a head of magnificent pods. As nearly all of the pods are produced underneath the foliage, excessive heat does not affect it in the least, a very valuable feature whether grown for home, the market garden or for shipping long distances. As a canning bean Buckbee’s New Monarch is without an equal, as the pods are long enough to fill the jar and the beautiful color is retained after cooking. We control the entire stock of Buckbee’s New Monarch Wax Bean. Send to Buckbee’s for choicest stock seed of our own growing; especially selected for disease resistant qualities. Pkt. 10c; ½ lb. 30c; lb. 50c, postpaid.

BEET

Buckbee’s Sunset Blood Turnip Beet

Without Exception the Best Second Early and Main Crop Variety. Round as a Ball. Dark Red Color. Tender, Fine Grained and Sweet.

An improvement in turnip-shaped beets for table use, and by far the best early, dark red turnip beet in cultivation. Roots are globular and smooth, with flesh deep vermilion red, crisp and sweet. Tops small, upright growing, which allows close planting, making possible the biggest yield per acre of any turnip-shaped variety. The stock which we offer will produce a crop more uniform in shape, color and quality than any other beet. This beet excels in handsome form, good size, small tops, very small tap root, fine quality, and, above all, quick rapid growth. Takes on its turnip shape very early, a decided advantage for forcing for early market and especially for a market where beets are sold in bunches. A favorite sort in all sections of the country. Send to Buckbee’s for choicest stock seed of our own growing; especially selected for disease resistant qualities. **Buckbee's New Jumbo Kleckley Water Melon**

The Acme of Perfection—Half Again as Large as the Original Kleckley.

For years we have been trying to get a Kleckley Melon of large size without sacrificing quality. In our new Jumbo Kleckley we have a wonderful yielder under almost any conditions of weather and soil. Melons are large and solid, sweet and juicy and can be eaten almost to the rind, which, though thin, is tough enough to stand handling. This Perfected Melon is the true Kleckley shape and has the same deep green skin which has always made them so attractive when displayed in the market. Add to this the extra large size and you have a truly wonderful fruit. Notwithstanding its large size, it is solid and firm and does not crack easily. Flesh is bright red, and of excellent quality. When we first introduced this Melon, it was met with favor everywhere, and the demand for seed now exceeds that of any other variety excepting Buckbee's Monte Cristo. We have a splendid supply of seed, still we advise early orders to avoid a possible disappointment. Send to Buckbee's for true stock seed. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; lb., $1.50, postpaid.
Buckbee’s New Vigorosa Peas

This grand, exceptionally good, new Pea is, beyond all reasonable doubt, the very best Second Early variety that has ever been introduced. The extended history of Pea culture gives us no example of a production anything near the equal of Vigorosa. It is absolutely unparalleled. No bushing at all is required. The vines grow to be but 20 inches tall and are so stout they bear immense crops without falling. As an enormous yielder the New Vigorosa ranks first, and has no close rival. When it comes to quality—well, that is one of its many strong points. No one who knows the merits of real Peas could possibly find fault with it. It pleases critical judges, which means it is all that we claim for it. Those of our customers who have tried it say it is better than we represent it to be. Pkt. 10c; ½ lb. 25c; lb. 42c; 2 lb. 75c; 5 lb. $1.85; 10 lb. $3.29, postpaid.

Grant’s Favorite

The Ideal Home Garden Pea. Tall Vines, Large Pods; Luscious Peas Which Are Rich and Finely Flavored.

This fine variety of our own introduction is unquestionably the sweetest late Pea ever offered, coming into use just after the early varieties are through bearing. A luxuriant grower from 4 to 5 feet high. The pods are of good size, and always well filled with exceptionally sweet and highly flavored Peas. It is nearly an upright grower, but will do better if staked or planted along a fence. Pkt. 8c; ½ lb. 21c; lb. 38c; 2 lb. 71c; 5 lb. $1.65; 10 lb. $2.80, postpaid.

Bruce Wilkerson, Austin, Texas—We are ordering your Peas again, as the seeds we bought from you last produced more Peas, and throughout the season, while neighboring gardeners’ crop were dried up.

One-half pound each of Buckbee’s New Vigorosa and Grant’s Favorite—two of the world’s finest Peas, for only 38 cents, postpaid.

J. G. Henry, St. Peters, Mo.—Buckbee has the finest Peas I ever saw. Large, well-filled pods. We had Peas continually until late August.

Buckbee’s New Hearts of Fire Tomato

This Grand New Tomato Is as Nearly Perfect as Any We Have Ever Seen. Fruits Are of Uniform Size, Heavy, Solid, Attractive, Sweet, Smooth, and of Unequalled Flavor.

Too much praise cannot be given this Tomato, as it is in a class by itself, being equally desirable for any use for which Tomatoes are grown. Its perfect shape and color commend it to the market; its size, quality and flavor make one of the best for all table uses, and its earliness, solidity and productiveness make it valuable for the canner. It is surely a wonder Tomato, and can be used for market canning or home garden. The vines are strong growers, but not rampant enough to decrease the yield of the fruits. On the contrary this New Tomato is one of the heaviest yielders we have. The fruits are large, often weighing a pound or more and are perfectly smooth, and seldom crack. Color is a rich, bright crimson and penetrates clear through the fruit. There are few seeds, making nearly solid flesh. Shape is well shown by illustration. Matures very early for such a large variety and continues to bear its large, solid, smooth, finely shaped fruits until the plants are killed by frosts. We control the entire stock of this Tomato. Pkt. 15c; ½ oz. 25c; oz. 45c; 2 oz. 80c; ½ lb. $1.55; 1 lb. $2.80; 1 lb. $5.25, postpaid.

This distinct variety is the very earliest Onion in cultivation. Of a pure paper-white color, very mild and delicate in flavor; from 1 to 1 ½ inches in diameter and ⅔ of an inch in thickness. **Early White Welsh**

For Green Onions. A most desirable green bunch Onion. It does not form bulbs, only enlargements at the base of each shoot, which are quite attractive and, being extremely early, sell well before Onions grown from sets are brought to the market. We recommend this variety very much and know market gardeners will find it an exceedingly profitable crop. A hardy perennial and can remain in the ground for years. Pkt. 10c; oz. 35c; 2 oz. 40c; ¼ lb. 75c.

**Australian Brown**

This sort is distinct from all other Onions. Is uniform in size and shape, wonderfully hard, solid and heavy, and will keep almost indefinitely. Ripens extremely early and never makes stalls. **Buckbee’s Selected Yellow Globe Danvers**

Buckbee’s strain of Yellow Globe Danvers, developed by careful selection and breeding, is pedigreed stock of the highest type, far superior to the seed mostly offered by others. This stock produces bulbs of fine symmetrical shape, large size, average specimens weighing from 1 to 2 lbs. each. These bulbs have small necks and ripen evenly. The skin is a light golden brown; the flesh is finely grained, pure white, crisp, mild and of excellent flavor. It is a grand, magnificent keeper and shipper. **Buckbee’s Genuine Bermuda Onion Seed**

Bermuda Onions are largely grown in the South, and have proven a most profitable crop. They are planted there in the fall and shipped North in May and are the earliest large new Onions in the market. Growers can do equally well with them in the North. They are the quickest growing Onions known. Sown at the same time as Danvers and White Portugal, they will produce full grown bulbs about 3 inches in diameter when the others are only 1 inch in size.

**CRYSTAL WHITE WAX—**This new variety is a large, pure-white flat Onion. It is the earliest and most popular Onion in the South. It produces the mildest and sweetest Onions of them all. It is very fine for slicing, the color being so clear and pure. Our stock seed each year is imported direct from Canary Islands, where the only True Bermuda Seed is grown. Pkt. 10c; oz. 30c; 2 oz. 55c; ¼ lb. 1.00; ½ lb. 1.80; lb. $3.35.

**WHITE OR YELLOW BERMUDA—**Bulbs broad and flat in form. The color is not a clear white, but rather a pale straw. Flesh crisp, solid and mild, early ripening. Pkt. 10c; oz. 30c; 2 oz. 50c; ¼ lb. 90c; ½ lb. $1.50; lb. $3.00.

PARSNIPS

The value of the Parsnip as a table vegetable is well known but is not generally appreciated at its full value for stock feeding. On favorable soil it yields an immense crop of roots, more nutritious than turnips and very valuable for dairy stock.

Parsnips are usually grown on deep, rich, sandy soil, but will make good roots on any soil which is deep, mellow and moderately rich. Fresh manure is apt to make the roots more nutritious than turnips and very valuable for dairy stock.

Roots fine size, of good diameter, enabling them to be easily gathered; are exceedingly smooth; the flesh fine and flavoring, and thin the plants to 6 inches apart in the row.

Buckbee's New Sugar

Parsnips are one of the few Winter vegetables. The roots are hardy and are improved in flavor by the action of the frost.

After repeated trials at Rockford Seed Farms we have no hesitancy in offering Buckbee's New Sugar as the best Parsnip grown. Roots fine size, of good diameter, enabling them to be easily gathered; are exceedingly smooth; the flesh fine and of the most excellent quality. A magnificent crop, yielding as high as 700 bushels per acre under good cultivation. You will not be disappointed by planting BUCKBEE'S NEW SUGAR PARSNIP. Pkt. 10c; oz. 15c; 2 oz. 25c; ½ lb. 40c; ½ lb. 75c; lb. $1.25; 2 lb. 2.40; 5 lb. $5.75; 10 lb. $10.85, postpaid.

Improved Hollow Crown

An excellent variety for the table. The roots grow to a length of about 15 inches with a diameter at the top of 3 inches. Very productive. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 25c; ½ lb. 40c; lb. 75c; 2 lb. $1.45; 5 lb. $3.50; 10 lb. $6.50, postpaid.

“FULL OF LIFE” ONION SETS

Buckbee's New Yellow Potato

Excellent for Green Bunching Onions—Very Early and of Rich, Mild Flavor

Of golden yellow color, excellent quality and good keepers. The bulbs produce clusters of small ones often as many as twenty from a single bulb. Onions are ripe much before any other variety. Excellent for Green Onions and also for pickling. This is the Onion to plant for all purposes. We have grown an unusually fine lot of sets this year and although there is a short crop, the quality is the finest we have ever had. Postpaid, ½ lb. 25c; 1 lb. 45c; 3 lbs. $1.10.

Egyptian or Perennial Tree Winter Sets

This variety never forms a large bulb, its value lies wholly in its special adaptability to produce green Onions for Spring or Fall uses. It is perfectly hardy, and when once set out will come up year after year. Should be planted in the Fall when the ground is firm. We also supply these sets for shipment September 1. This variety increases by producing sets at the top of the stalk and does not produce seed. Postpaid, ½ lb. 18c; lb. 30c; 3 lbs. 70c.

Bottom Onion Sets

Bottom Onion sets produce an Onion ready for market or the household from 4 to 6 weeks earlier than can be done by sowing the seed, and the product of the set is identical with that of the seed. This gives the market gardener ample time to sell his entire crop at the early high prices and permits the grower of home use the same year. Every private garden should contain a sowing of sets.

BUCKBEE'S "Full of Life" PEANUTS

Our "Full of Life" Peanuts Are Grown for Seed Purposes Only and Are the Finest That Can Be Grown.

Peanuts have always been an important farm crop in this country; millions of acres have been planted with them in the southern states, but now that their great value for producing oil and oil-cake is being better realized, a much larger acreage will be grown with them. Last year about a hundred million bushels of Peanuts have been ground up by oil mills for oil and oil-cake, while a few years ago none had been used. A ton of Peanuts in pods produces 100 gallons of sweet oil and also 750 pounds of feeding cake. This oil and cake are superior to that from cotton seed. Peanuts are fully equal to olive oil and Peanut meal makes hard hog-feast.

The Peanut Family contain a larger percentage of oil than the other legumes and are favored by the oil mills who now pay a higher price for a bushel of them than for cotton seed. In the South, especially, on a sandy land, Peanuts will supplant cotton as a money crop, being more profitable. Every country, every market, always bringing fancy prices. Plants grow about 16 inches high, with heavy, erect stalks and large leaves, fruits near the tap root. Can be planted close together, thus producing a large yield, and are more easily cultivated than the running varieties. The pods fill out well, forming few, if any, pops. Should yield a gallon of nuts to one kernel planted. Postpaid, pkt. 7c; 1/4 lb. 18c; 1/2 lb. 36c; 1 lb. 50c; 5 lbs. $2.10; 10 lbs. $4.00. By express, not prepaid, 5 lbs. $2.25; 10 lbs. $4.00.

NEW MAMMOTH VIRGINIA

This Mammoth Virginia Peanut is more profitable and desirable than the common spreading kind, because more productive, earlier; yields fewer imperfect pods and is more easily cultivated and harvested, having very erect stems and upright foliage. The vines make valuable forage for stock. Will ripen even as far north as Canada. Hundreds of our young friends reported a wonderful crop the past season, showing that the Peanut is not limited to the South and is certainly a distinct improvement in appearance over any Southern variety now in use. Will do well on almost any kinds of soil, and fill out better than any other large variety. Can be pulled up with the vine same as the old Spanish Peanuts. The distinct long pods grow close together, thus producing a large yield, and are more easily cultivated than the running varieties. The pods fill out well, forming few, if any, pops. Should yield a gallon of nuts to one kernel planted. Postpaid, pkt. 7c; 1/4 lb. 18c; 1/2 lb. 36c; 1 lb. 50c; 5 lbs. $2.10. By express, not prepaid, 5 lbs. $2.25; 10 lbs. $4.00.

The distinct long pods grow close together, thus producing a large yield, and are more easily cultivated than the running varieties. The pods fill out well, forming few, if any, pops. Buckbee's Little Marvel

A New Dwarf Extra Early Pea of Unusual Value, in Enormous Demand Among Market Gardeners

We are sure that as soon as a gardener becomes acquainted with this variety he will quit growing the old varieties. In season the new sort ripens with the American Wonder, while the pods, usually borne in pairs, are more numerous, larger and contain one or two more Peas. Its two striking features are: The beautiful dark green color of the pods and its great keeping qualities when ready for the table. These Peas retain their color and attractive appearance the whole season. We are certain that as soon as a gardener becomes acquainted with this variety he will quit growing the old varieties. In season the new sort ripens with the American Wonder, while the pods, usually borne in pairs, are more numerous, larger and contain one or two more Peas. Its two striking features are: The beautiful dark green color of the pods and its great keeping qualities when ready for the table. These Peas retain their color and attractive appearance the whole season.

New Early Gradus or Prosperity

The Earliest, Largest Podded Wrinkled Pea.

This popular Pea matures only two or three days later than the small-podded, round-seeded Extra Earlies, but has pods as large as those of the Telephone Pea and is fully equal to it in quality. Gradus is probably the most popular of all the extra early wrinkled Peas. It has taken the place of the smooth early Peas to a great extent. It grows from 3 to 3 1/2 feet high, requiring no sticks or brush, but sticks may be used if preferred. The Vines are of pale green color and bear in great profusion from top to bottom immense round, dark green pods, 5 1/2 to 6 inches long, well filled with from 8 to 10 or more Peas of delicious quality as large and as rich in flavor as the Telephone Peas, and these Peas can be had only a few days later than the small extra early Peas. These Peas retain their color and attractive appearance the whole season.

Thomas Laxton

Extra Early Large Podded Sweet Wrinkled Pea.

The rival to the famous Gradus—as a long-podded, extremely early wrinkled Pea. The growth is identical but the pods are deeper, richer green, square at the end and contain more Peas. In the opinion of some experts, Thomas Laxton is even sweeter and finer in flavor, while as the large Peas are of a deeper green, they present a more attractive appearance on the table. The crop ripens only 3 to 4 days after Gradus. A splendid market gardener sort, but especially recommended for the home garden.

Sutton’s Excelsior

Buckbee’s New Early Little Marvel.

Early and productive, with large broad pods. It grows about 15 to 18 inches high, and is an exceedingly heavy bearer. The pods are 3 1/2 inches long, very broad, square at the end, and are packed with 6 to 8 immense wrinkled Peas. It is one of the sweetest Peas grown, and is unexcelled in delicious, melting quality, and superb, rich flavor. The vines and pods are of a light green color.

New Early Gradus.

Potlatch or Big Dinner Peas.

The Best Main Crop Variety of Large Podded Dwarf Peas.

Potlatch is Chinook Indian for Big Dinner. The vines are sturdy and vigorous, growing about 20 inches high, with coarse and unusually dark green foliage which can be distinguished from those of other peas a quarter of a mile away. The pods, which are borne in pairs, are long, often measuring 6 inches or more. They are broad, pointed, rich dark green in color and in size and fullness fully equal to those of the Tall Telephone Peas. They contain 9 to 11 Peas, which are very large and in sweetness and flavor rank with the finest. Potlatch is a wonder of productiveness and the way the Peas shell out is astonishing. On account of its large, beautiful pods and enormous productiveness, it is a great favorite with market gardeners, and owing to delicious quality one of the best for the table. Potlatch is a second early, dwarf, very large podded Pea; it has become the leading and most popular variety of its class.

Buckbee's "Full of Life" Seeds Are Bred for Disease Resistant Qualities

Buckbee's Crimson Giant Globe

Our Crimson Giant Globe Radish is one of our leading specialties, and many of our gardener friends who grow for market look forward for large quantities every season. See Page 3 of this book for prices in quantity. This Radish is an entirely new type and differs radically from all varieties hitherto in cultivation, insofar as its roots attain more than double the size of other round, early varieties, without getting pithy or hollow. It is very early, notwithstanding its size. Color crimson, flesh pure white, of the best quality. The roots often weigh 1½ ounces each and are crisp and juicy. Fine for outdoors and forcing. The seed should be sown very thinly to permit full development of the roots. Pkt. 8c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 60c; lb. $1.00; 2 lb. $1.90; 5 lb. $4.90; 10 lb. $8.95, postpaid.

Buckbee's New Triumph

The Greatest Radish Novelty

Both unique and useful. Matures early, generally in about 14 days. Nothing produces a more pleasing effect on the table than this beautiful variety. The roots are of globular form, tops are short and attractive, which makes it valuable for cultivation under glass. The flesh is very crisp and solid and of mild pleasing flavor. Its most attractive and distinctive feature, however, is the unique color of the skin. The ground color is beautiful ivory white, striped horizontally and splashed with bright scarlet. Sure to become popular with market gardeners and private planters. Pkt. 10c; oz. 15c; 2 oz. 35c; ½ lb. 35c; ½ lb. 60c; lb. $1.10; 2 lb. $2.10; 5 lb. $5.00; 10 lb. $8.95, postpaid.

BUCKBEE’S "Full of Life" TOMATOES

Buckbee’s “Full of Life” Seeds Are Bred for Disease Resistant Qualities

Buckbee’s New 50-Day Tomato
The Largest Fruited, the Smoothest, the Finest in Quality of all Extra Early Scarlet Tomatoes

Originated on our Rockford Seed Farms. Called 50-Day Tomato because it produces large, ripe fruits on strong plants in 50 days from time they are set in the open ground. The vines are short, very vigorous, enormously productive and ripen a very much larger crop at the early part of the fruiting season than any other extra early variety. The fruits are globular, always entirely free from cripples, wrinkled or cracked fruits, and weigh on an average about 5 oz. each, although many fruits as heavy as 6½ oz. each and over have been found in our fields. The color of the fruits is a beautiful bright scarlet. They ripen evenly, well up to the stem, have no hard core, small seed-cells, and are practically all heavy, solid meat of mild and most delicious sweet flavor. The skin is thin, but very tough, making it a splendid long-shipping variety.

Compared with Earliana, 50-Day is a much heavier cropper and its fruits of much larger size, smoother, of better quality, containing less seed and more meat. They are of better appearance and therefore better sellers; furthermore, they ripen practically as early. Fifty-Day will soon replace Earliana, and it should also be planted in place of second early sorts like Bonny Best and Chalk’s Jewel, being earlier, more productive and producing fruits fully equal in size, beautiful appearance and of better quality; only Buckbee’s Earliest Market is a few days earlier than 50-Day, but has somewhat smaller fruit.

Price, pkt. 10c; oz. 50c; 2 oz. 90c; ¼ lb. $1.50; ½ lb. $2.60; lb. $4.75. Postpaid.

Buckbee’s New Earliana
Buckbee’s Pedigreed Strain.
An Extremely Early, Smooth, Bright Red Tomato of Good Size and Flavor.

Is among the very first ready for the market, and not only remarkable for its earliness, but for its very large size, handsome shape and bright color. The vines are small but vigorous and very productive, bearing the fruits in clusters near the base of the plant. The fruits grow about 3 inches in diameter, have solid thick flesh of splendid quality and are excellent shippers. Send to Buckbee for the earliest strain.

Price, pkt. 8c; oz. 30c; 2 oz. 55c; ¼ lb. $1.05; ½ lb. $1.90; lb. $3.50; 2 lb. $6.80; 5 lb. $16.50; 10 lb. $30.90, postpaid.

BUCKBEE’S EARLIEST MARKET
The Earliest Large Smooth, Scarlet Tomato in Existence.
Indispensable to the Market Gardener.
A Great Money-Making Tomato.

This variety bears fruit which in size, shape, color, solidity and quality compares favorably with the noted later kinds, and by repeated trials at Rockford Seed Farms and elsewhere has demonstrated that it ripens up a larger portion of its crop the earliest of any variety. It is, without question, the earliest good, large scarlet Tomato. Gardeners and Tomato fanciers will readily see the advantage obtained over their competitors by growing Buckbee’s Earliest Market. This is the variety which will give them the opportunity to be first on the market with a large crop of beautiful large fruits, selling readily at good prices.

Compared with the well-known Earliana, Earliest Market is about a week earlier, the fruits are fully as large, smoother, have no hard core, while Earliana is often rough and has large seed cavities. Furthermore, Earliest Market is much more prolific. An excellent kind also for the home garden, and if you have not given this wonderful variety a trial, be sure to include it in your order for 1932.

Price, pkt. 10c; oz. 40c; 2 oz. 75c; ¼ lb. $1.40; ½ lb. $2.50; lb. $4.50.
BUCKBEE'S NEW TOMATO
ABRAHAM LINCOLN

The World-Beating Tomato

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—This world-beating Tomato was originated on Buckbee's Rockford Seed Farms and named in honor of Illinois' greatest son—Abraham Lincoln. This Giant of All Tomatoes was introduced by us in 1923 and is the largest Tomato ever grown. We have had 9 tomatoes in a single cluster with a total weight of 7 pounds; the average weight is about a pound and we have grown many weighing nearly 3 pounds. Beautiful dark red, attractive fruits, heavy, large, sweet, solid and meaty with very few seeds. For so large a tomato it is remarkably smooth and free from cracks and seams.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—usually bears fruit in clusters of from four to six; the individual fruit, 5 to 7 inches in diameter, runs remarkably uniform in size and shape, being almost round, solid and weighs about one pound each or heavier than any other tomato grown; the surface is very smooth and seldom cracks; the color, a rich blood-crimson, also permeates the flesh to the very heart; it ripens thoroughly, coloring up clear to the stem.

BUCKBEE'S NEW TOMATO—ABRAHAM LINCOLN—possesses one crowning merit, the phenomenal solidity of the flesh. Even the seeds, which are small and few, are embedded in flesh of meaty firmness.

Edward Molnar, Budapest, Hungary—Your Abraham Lincoln Tomato is a great success. The most wonderful Tomatoes I ever saw.

Buckbee's "Full of Life" Seeds are bred for disease resistant qualities. Pkt. of 150 seeds 20c; 3 pkts. 50c; ½ oz. $1.25; 1 oz. $3.50. Postpaid.

Mrs. Joseph J. Ackerman, Center Brook, Conn.—Your Abraham Lincoln Tomatoes weighed over two pounds last year. I surely cannot afford to be without them.

New Golden Ponderosa
Extra Large Fruits—Heavy Yielder—Solid—Few Seeds.
Attractive and Reliable
A splendid novelty. Equals its famous parent, the Red Ponderosa, in every respect but color. It possesses its large size, heavy meat and luscious quality, and in addition is of a striking rich golden yellow color, making a novel and most attractive table effect, especially when served sliced with a red variety. This is the largest of the yellow varieties in cultivation. The fruits are very uniform in shape and size, contain but little core and few seeds, and are a solid mass of succulent meat. Their skin is thin and they ripen the first fruit quite early, continuing to bear until frost. Buckbee’s strain is exceptionally fine, bearing smoother and larger fruits than are generally seen. Pkt. 15c; ¼ oz. 50c; 2 oz. 95c; ½ lb. $1.75; ¼ lb. $3.25; lb. $6.00, postpaid.

Buckbee’s New Early June Pink
The Earliest Pink in Cultivation—Medium Size, Round, Smooth and Solid.
The earliest of the pink fruited Tomatoes, similar to the popular scarlet-fruited Earliana in growth of vine, shape and size of fruit and time of maturing. This is of exceptional value to market gardeners, who want an early, pink-fruited Tomato. The vines are compact and branch freely, bearing their handsome, good-sized deep pink fruits in large clusters continuously throughout the season until frost. It is very popular as a market and shipping variety and most desirable for the home garden. Our seed is superior to that commonly offered by others and will produce fruits earlier, larger, smoother, of better shape and color. Pkt. 8c; oz. 40c; 2 oz. 75c; ¼ lb. $1.40; ½ lb. $2.50; lb. $4.50; 2 lb. $8.90; 5 lb. $21.95; 10 lb. $42.40, postpaid.

Buckbee’s Bonny Best
Plants Are Very Vigorous, ofRobust Growth and Fruit Continuously Throughout the Season.
The fruits are very smooth, round, very deep, solidly meaty, with only a few small seed cells; of bright deep scarlet color and of excellent quality. Very desirable for the home gardener and one of the best for market gardeners whose trade demands extra fine fruits. As a canning sort it yields unusually heavy crop per acre, grading as No. 1. Pkt. 8c; oz. 30c; 2 oz. 55c; ½ lb. $1.60; ½ lb. $1.80; lb. $3.50; 2 lb. $6.40; 5 lb. $15.75; 10 lb. $29.00, postpaid.

Fruits larger, smoother, with less seeds than those of Earliana, but somewhat later. For early crops the New John Baer Tomato is planted exclusively in many sections supplying large city markets. Plants are compact in growth, with short, close-jointed branches, setting fruits very freely in the center. Most valuable for the market gardener and very desirable for home use. Pkt. 8c oz. 30c; 2 oz. 55c; ¼ lb. $1.00; ½ lb. $1.80; lb. $3.25; 2 lb. $6.40; 5 lb. $15.50; 10 lb. $29.00, postpaid.

Buckbee’s New Early June Pink

Buckbee’s Early June Pink

Buckbee’s Dwarf Ponderosa
A true Dwarf Ponderosa. The fruits are glossy purplish-red, with solid, meaty, bright red flesh; no core and but few seeds. They are fully as large as those of the Tall Ponderosa. Plants grow about 2 feet high, stocky and branching, bearing Tomatoes in great clusters from July until frost. This enormous but erect growing variety is one of the most important advances made in Tomatoes, especially adapted to the home garden. Pkt. 10c; ¼ oz. 30c; oz. 50c; 2 oz. $1.00; ½ lb. $1.85; ¼ lb. $3.45; lb. $6.50, postpaid.

BUCKBEE’S “FULL OF LIFE” TOMATOES

BUCKBEE’S NEW TREE TOMATO
Firm, Solid Thick Flesh, Large Meaty Center.

This grand Tomato owes its popularity to its stiff, vigorous, upright growth, with fruit well above the soil, and to the earliness with which it reaches its maturity. In color the fruit is purplish pink, form always round and symmetrical and of medium size. Buckbee’s New Tree Tomato is immensely productive, clusters of four to six fruits being produced in abundance along the stem. All of the fruits grow to a marketable size. The table qualities are the best as is the case with this variety, the seed cells being surrounded by rich, heavy flesh. This feature also makes it desirable for canning. As a shipper it stands up remarkably well, arriving at its destination in fully as good condition as when it left the field. This wonderful Tomato leaves nothing more to be desired, as it is mild, pleasant and of delicious flavor. Being a strong, robust grower, it has a broad foliage which prevents sunburn in hot sections.

Pkt. 10c; oz. 40c; 2 oz. 75c; ½ lb. $1.40; ½ lb. $2.50; lb. $4.50, postpaid.

BUCKBEE’S SNOWBALL

A grand new variety of recent introduction, which always gives the best of satisfaction. Color is purest white inside, skin nearly the same shade, flavor unexcelled, flesh firm and solid. Almost a continual bearer, coming into fruit early and yielding throughout the season an abundance of fine Tomatoes which are 1½ inches in diameter, round and smooth. No better variety can be found for table, pickling or canning purposes. Pkt. 10c; 3 pkts. 25c; ½ oz. 40c; oz. 75c.

Strawberries from Seed

BRASILIAN EVERBEARING

It will begin to bear fruit in about four months after seed is sown and continues to produce fruit until very late in the Fall. Seeds sown in April will give ripe berries in July. The berries are not as large as the standard varieties, but are of superior quality and have the rich wild Strawberry flavor. The plant is ever-bearing in the true sense of the word, producing fruit all Summer, and comes perfectly true from seed. It also makes a beautiful pot plant, will grow well in the house, and even fruit during the Winter. Perfectly hardy everywhere and easy to grow. A packet of seed should produce 40 to 50 plants. Pkt. 15c; 2 pkts. 25c.

The Sunberry or Improved Wonderberry

This is without question Luther Burbank's greatest production; a luscious berry that may be grown and ripened from seed in any soil or climate in three months.

Fruit more like a great, rich, luscious blueberry than anything else. Beautiful color, fine flavor and unsurpassed for eating raw, cooked, canned or preserved in any form. It is easily the greatest garden fruit ever introduced. Easiest plant in the world to grow. Succceeding anywhere and yielding great masses of rich fruit all Summer and Fall. The quality is sweet and delicious when fully ripe. Like the grape, it should have time to ripen well after coloring in full sun. Skin, which may seem a little tough in a raw state, cooks tender. Seeds small, one-quarter the size of Tomato seed, and cook soft, and are not noticeable. We offer this desirable garden delicacy in two distinct colors.

BUCKBEE'S "FULL OF LIFE" TOBACCO

Buckbee's "Full of Life" Tobacco Is Bred for Highest Quality

Beats All or Lacks—For the Black Belt of Virginia, Kentucky and Tennessee. It makes a big yield per acre and cures into a rich, gummy black leaf. Makes splendid black wrappers. Pkt. 10c; ½ oz. 35c; oz. 60c.

Blue Pryor—A very large, heavy variety that is used extensively throughout the Black Belt for making either black wrappers or fillers. Pkt. 10c; ½ oz. 35c; oz. 60c.

Brazilian—A domestic cigar variety that is used quite extensively for home use. It is early, easy to handle and has a very pleasant aroma. Good for both wrappers and fillers. Pkt. 10c; ½ oz. 40c; oz. 65c.

Comstock Spanish—One of the most popular varieties for making domestic cigar tobacco. It is used very extensively throughout the Bright Belt, and will be found the best variety to grow for home use. The leaf is rather long and of medium width, making it ideal for either wrapper or filler. The leaf is of medium broad and tapers to a sharp tip. Cures into a bright lemon yellow when grown upon a medium fertile sand or gray soil. Pkt. 10c; ½ oz. 35c; oz. 60c.

General Grant—One of the finest, earliest and most popular kinds for cigars. Matures as far north as Canada. Leaves large. Pkt. 10c; ½ oz. 35c; oz. 60c.

Improved Gold Leaf—For the Bright Belt of Virginia, North Carolina, South Carolina, and Georgia no better variety has ever been found. It makes a product of excellent color and retains its weight. Thus growers obtain better returns. The leaf is long, medium broad and tapers to a sharp tip. Cures into a bright lemon yellow when grown upon a medium fertile sand or gray soil. Pkt. 10c; ½ oz. 35c; oz. 60c.

Improved Havana—The finest Cuban stock, imported from the famous Vuelta Valley. Pkt. 10c; ½ oz. 30c; oz. 50c.

Improved One Sucker—For the Black Belt of Kentucky, Tennessee and Virginia there are few varieties that will make such a rich heavy leaf as this. The leaf is long medium wide and very tough, rich, and gummy when fire cured. Pkt. 10c; ½ oz. 35c; oz. 60c.

Improved White Burley—This is the standard variety for the Burley Belt of Kentucky, Tennessee, Ohio, Illinois, Indiana, etc., and makes a manufacturing leaf of exceptional quality. It is easily cured into a bright yellow or rich red leaf of good weight. Pkt. 10c; ½ oz. 35c; oz. 50c.

Improved Yellow Pryor—This variety is often used in the Black Belt for air or fire curing and makes a good rich wrapper. Then in the Flue cured district it is used for making a lemon yellow wrapper. In either place it is an excellent sort and worthy of extensive cultivation. Pkt. 10c; ½ oz. 35c; oz. 60c.

Sweet Oronoko—This variety is adapted to a wide range of soils and uses. It will make a good black, mahogany, or bright tobacco and can be either Flue, Air, Fire, or Sun cured. For home use there is nothing better in chewing tobaccos. The leaf is long, narrow and cures into a heavy rich product. Pkt. 10c; ½ oz. 30c; oz. 50c.

Vuelta de ABAJO—For those who wish an imported Havana tobacco, nothing finer than this can be found. It is the finest strain of cigar leaf grown in this country one year from imported seed. This gives it a stronger constitution, slightly larger leaf, but it still retains its rich gum and high flavor. Pkt. 10c; ½ oz. 40c; oz. 65c.

Buckbee's Giant Japanese

Buckbee's Special Hog Pasture Mixture

Especially prepared for quick results and a full crop. This mixture is composed of the following annual varieties: Field Peas, Soja Beans, Vetches, Cowpeas, Crimson Clover, Rape, Sugar Cane, Japanese Millet, Turnips, Rutsahargas, Speltz, Rye and other grains and forage plants, all in the right proportion. This mixture will provide an abundant pasture, within six weeks from day of sowing the seed, continuing green and bountiful until destroyed by frost; almost all of these varieties will come up again as fast as they are eaten down and will furnish 4 to 5 times as much forage as can be obtained from any clover-grass mixture, and this food is succulent and nutritious and much relished by hogs; it will keep them healthy and strong and they will gain in weight easily and quickly. This mixture will provide a most profitable investment for every farmer, not only for feeding hogs but also all other farm stock. It is usually sown about corn planting time, but can also be sown as a catch crop any time during the season until August. Use 100 pounds for 2 acres. Price, 10 lbs. 80c; 25 lbs. $1.50; 50 lbs. $3.15; 100 lbs. $5.65, by express or freight not prepaid.

Buckbee's Combination Lawn and Garden Invigorator

The Marvelous Lawn Tonic—The Wonder Fertilizer—The Unequalled Garden Medicine.

Extensive experiments have convinced us that this unequalled Fertilizer or Garden Invigorator is the most wonderful product of its kind ever offered. This last season we have given it Anal and the results were always the same—simply marvelous.

A Petunia Bed, with our combination Invigorator sprinkled lightly on the soil, showed an increase in size of the flower, and more brilliant colorings. Vegetables planted in poor soil in July when others were well started towards bearing, not only made heavier yields, but matured almost as soon as the earlier planted garden. Lawns with an application of 25 pounds to 1000 square feet grew heavier sod of a richer color, and were still as green on December 1st as in the Summer time. Keep a bag on hand always. You will need it almost the year round. For sale only by H. W. BUCKBEE, so send to us for BUCKBEE'S COMBINATION LAWN AND GARDEN INVIGORATOR. Packed in 3 size bags to meet all requirements. NOTICE—All varieties marked (S) are Staminate Perfect Flowering and Bi-Sexual varieties. All varieties marked (P) are Pistillate and destitute of Stamens. Therefore when planting varieties marked (P) it will be necessary to have every third row a Perfect Flowering or (S) variety to properly fertilize the bed; much finer fruit will be obtained by so doing.

For example—if your order calls for 200 Great Ruby (P) you should also have 100 Great Northern (S) to properly fertilize the bed. Plant the first two rows with Great Ruby (P) and the third row with Great Northern (S) and so on; or you can use any other (P) and (S) varieties in the same manner.

MONEY IN STRAWBERRIES

A Strawberry Bed is a safe and sure investment. Greatest of all Money Makers. $600.00 profit per acre. Only one expense—the cost of plants, which is merely nominal—lasts for years.

EVERBEARING OR FALL-BEARING STRAWBERRY

BUCKBEE'S HARDY SHRUB AND HEDGE PLANTS

New Red Leaved Japanese Barberry

Berberis Thunbergia Atropurpurea.

The newest and most beautiful hardy ornamental hedge plant ever grown. It is similar in every way to the green leaved Japanese Barberry, which is so popular for mixing in the shrubbery border as single specimens, or for planting in clumps on the lawn as well as for foundation plantings and for hedges. The greatest charm and beauty of this new variety is the foliage which is a rich, lustrous, bronzy red, similar to the red leaved Japanese Maples. As the season advances this red leaved variety becomes exceedingly brilliant and of gorgeous colorings, which in the late fall, its foliage changed to vivid orange-scarlet and red shades. If planted in a sunny location, one may reasonably expect the brightest coloring. Perfectly hardy everywhere—even in our most northern states. Postpaid, small plants, 15c each; 3 for 40c; doz. $1.50. Larger sizes, 25c each; 3 for 70c; doz. $2.50. By Express collect, $0.00 per 100.

Japanese Barberry

(Green Leaved) This is the variety with which we are all familiar and a most satisfactory variety to grow. The plant in itself is a beautiful variety with small foliage, changing to various shades and tints of coloring in the autumn. Bears attractive scarlet berries which remain on the plant the greater part of the winter. Largely used as foundation planting, particularly in groups around the base of a porch to hide the foundation walls. Unusually strong and hardy and will do well either in sun or shade. Of such low regular and compact growth that it requires little or no trimming. Postpaid, 15c each; 3 for 30c; doz. $1.25. Larger sizes 25c each; 3 for 55c; doz. $2.00. By Express collect, fine plants $8.00 per 100; extra large size $12.00 per 100.

Rose of Sharon

The Rose of Sharon or Altheas is one of the finest of our hardy shrubs or hedge plants. The flowers bloom from August to October, at a time when so few shrubs are in flower. Can furnish either white, pink or red.

Fine young plants, 20c each; 3 for 55c, postpaid.
Extra size plants, 40c each, by Express collect.

Amoor River Privet

This is the hardiest of the Privets and can be grown anywhere in the United States, being especially desirable for hedge planting in the North, where winters are severe. It is far superior to any other similar hedge as it is not subject to blight. The dark green foliage is retained until late in the fall, and can be trimmed to give any desired effect.

Select plants, 35c each, 3 for $1.00, postpaid

California Privet

The variety commonly grown and hardy even in the Northern States if carefully protected. There is no doubt but that this is a most popular hedge and undoubtedly there is more of it planted than all others combined. Of free growth and succeeds under the most adverse conditions, even making good growth under the dense shade of trees, where no other plants could exist.

Postpaid, 6 for 40c; doz. 75c; large size, 6 for 80c; doz. $1.50.
By Express collect, Fine Plants, $5.00 per 100; extra large size, $8.75 per 100.

These magnificent Iris are among the most beautiful of our summer-flowering plants, and are becoming more popular every season. They commence blooming about the middle of June, and continue for five or six weeks. Many of the flowers measure from 10 to 12 inches in diameter and rival the Orchids in their rich colorings and markings. For cut flowers they should be cut in the bud state, allowing the bloom to expand when placed in water. Price, postpaid, Choicest Mixed, All Colors, 35c each; 3 for 95c; $3.50 per doz.

**BUCKBEE'S "FULL OF LIFE" PEONIES**

Peonies, especially the latest modern introductions, are probably the most valuable, and most beloved of all perennial plants. Planted in sun or semi-shade, in single clumps or long beds, or bordering lawns, shrub rows, and drives, they give a grand display of large fragrant blossoms of brilliant colors during June, followed by their exquisite foliage which is very ornamental during summer months. They are also most effective for home and table decorations, and last longer in water than many other perennials. Avoid buying cheap Peonies; they require just as much care as the better kinds, and are disappointing in the end.

**Parrots Feather**

An unusual plant that can be grown in aquariums or water tight containers and gives to the water the air that is so necessary to the fish. When grown out of doors, it is best to use a flower pot of dirt and submerge so that the water covers the top of the pot 1 inch. It should then grow and spread rapidly. 20c each; 3 for 55c, postpaid.

**Umbrella Palm**

A very decorative palm. Hardy, useful and beautiful window plant for all seasons, always fresh, green and attractive. Invaluable as an aquatic plant. Stems 2 to 3 feet high surmounted by whorls of leaves. 20c each; or 3 for 55c, postpaid.
